

THE ULTIMATE SELF-CONTAINED MOBILE CRUSHER

The RubbleCrusher RC150 is compact crushing solution for recycling construction and demolition waste materials on site. These low-tonnage crushers are perfect for all small- to moderate-sized crushing projects and provide a great solution for builders, landscape gardening, recycling, demolition and medium-sized aggregate crushing applications.

The Simple Yet Robust Add-On To Any Operation

Utilizing the same 650mm x 350mm (26" x 14") jaw crusher module, the RubbleCrusher RC150 is available in a track-mounted, trailer-mounted or skid-mounted design. They offer an on-site solution to reducing environmental impacts while saving operations time and money.

Adding one of the RC150 crushers to your inventory enables you to produce crushed material immediately on the very spot where the material has been collected, allowing for the crushed material to be recycled and reused on the jobsite.
